*Fire Plug®*  
*Fire Strip™*  
*Fire Safe*

**FirePlugs, FireStrips, and FireSafe** represent a cost-effective, firestopping solution designed especially to fit the irregular shaped voids in corrugated metal pan deck and straight joints found floor, roof and wall systems. These materials are one component of a complete firestop system.

## **DESCRIPTION**

**FirePlugs, FireStrips, and FireSafe** are made from a high temperature mineral wool product that installs quickly, eliminates the time consuming task of match-fitting the top edge of the drywall to the metal deck profile and reduces the cost of firestopping wall joints in gypsum or masonry wall assemblies constructed with a flat top edge.

## **ADVANTAGES**

**Time Savings** – 45% to 55% faster than castle cutting drywall or traditional “tear & stuff” installation of conventional mineral wool.

**Labor Savings** – Significantly reduces field cutting and fitting time along with the coating application time associated with alternative firestopping methods.

**Higher Coating Yields** – The smooth, even surface of the *FirePlugs, FireStrips, and FireSafe* provide higher coating yields versus coating applications over irregular surfaces.

**Reduced Sound Transmission** – *FirePlugs, FireStrips, and FireSafe* aid in the reduction of sound transmission across the top of gypsum and masonry wall assemblies.

**Added Assurance** – *FirePlugs, FireStrips, and FireSafe* give an extra measure of assurance that the completed firestop system will provide a positive flame, smoke, toxic gas and water seal over the typical field installed “tear & stuff” method.

## **APPLICATIONS**

Fire and Smoke Rated Partitions – *FirePlugs, FireStrips, and FireSafe* can be used in fire and smoke rated partitions and joints constructed of either gypsum board or masonry materials.

Exterior Curtain Wall & Other Joints – *FireStrips, and FireSafe* are supplied in precut strips for exterior curtain wall and other joint applications. When required by the firestop manufacturer design, please specify fiber orientation.

## **AVAILABILITY**

*FirePlugs* and *FireStrips* ship from stock. Please refer to charts on reverse side. Special cuts including *FireSafe* ship in 1-2 business days ARO.

## **ORDERING INFORMATION**

To order *FirePlugs* and *FireStrips* use the form on the reverse side of this form.

For *FireSafe* and special cuts contact **INTEK** Customer Service for assistance and quotations.
